

Extended character support

Turning on extended character support for reports

[Contact Species360 Support](#)

Some languages require extended character support. You must turn the Arial Unicode MS font on in Institutional preferences in order to support these characters in reports.

Institutional preferences->Language, Date/Time and Separator Formats-> Check to Support Extended Character Set

Languages that may use extended characters:

- **Central Europe languages:** Albanian, Croatian, Czech, Hungarian, Polish, Romanian, Serbian (Latin), Slovak, Slovenian
- **Cyrillic languages:** Azeri, Belarusian, Bulgarian, FYRO Macedonian, Kazakh, Kyrgyz, Mongolian, Russian, Serbian, Tatar, Ukrainian, Uzbek
- Greek
- **Turkic languages:** Azeri (Latin), Turkish, Uzbek (Latin)
- Hebrew
- Arabic, Farsi, Urdu
- **Baltic languages:** Estonian, Latvian, Lithuanian
- Vietnamese
- Thai
- Asian languages in general

Please note that you may need to install the Arial Unicode MS font if your system does not already have it. For more information, [go here](#).

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

Revised 10 August 2017

** Species360 Organizational name change added on 07/18/2016*

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.
