

## Life Support-Attach Component

How to attach a Component to a Life Support.

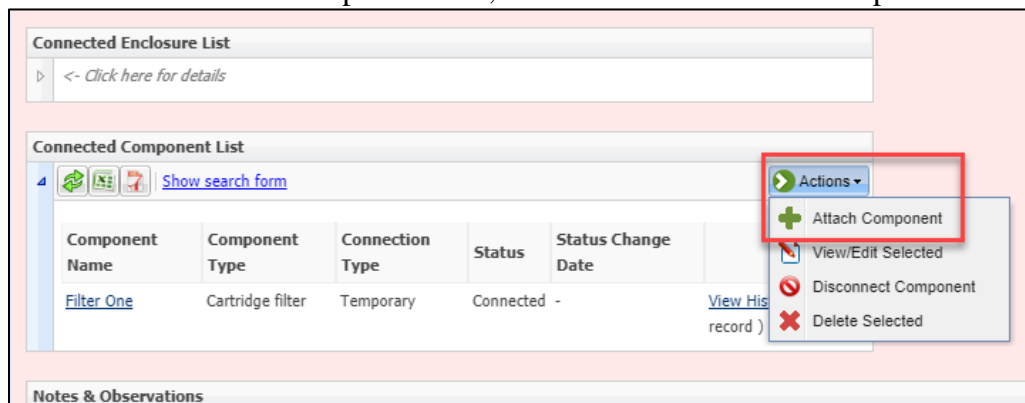

[Contact Species360 Support](#)

When you are adding a new Component, if the Life Support has already been created you can attach it before selecting to Save the new Component. If you did not attach it during that process, you will need to attach it from the Life Support record.

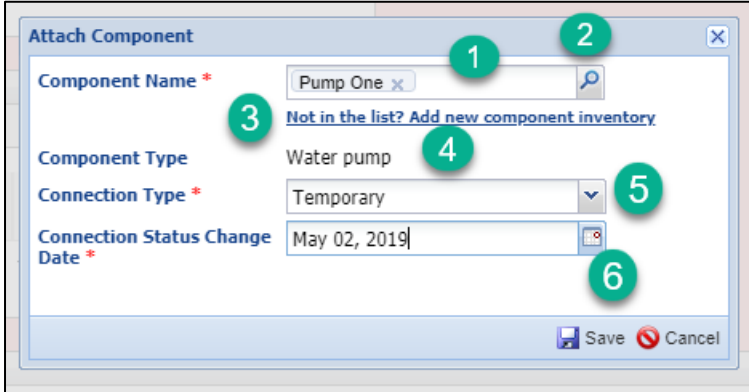

Open the Life Support module and find the appropriate Life Support using the Life Support Search or selecting it from the Life Support Tree.

From the Connected Component List, select Actions > Attach Component:

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

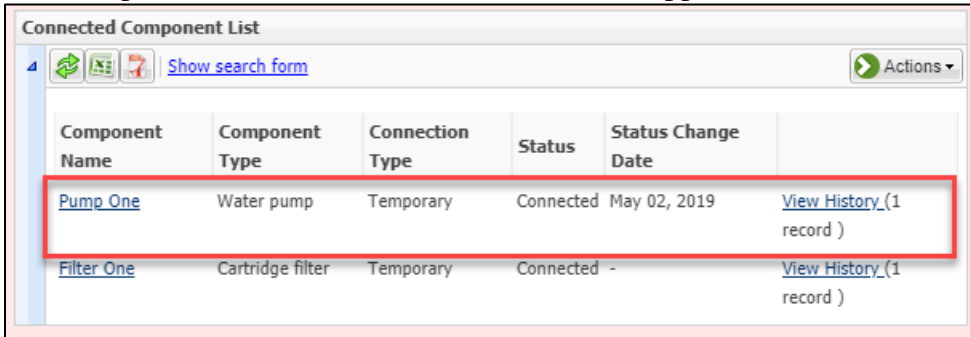

The 'Attach Component' dialog box contains the following fields:

- Component Name \***: A text input field containing 'Pump One' with a magnifying glass icon to its right.
- Component Type**: A dropdown menu showing 'Water pump'.
- Connection Type \***: A dropdown menu showing 'Temporary'.
- Connection Status Change Date \***: A date input field showing 'May 02, 2019'.

At the bottom of the dialog are 'Save' and 'Cancel' buttons.

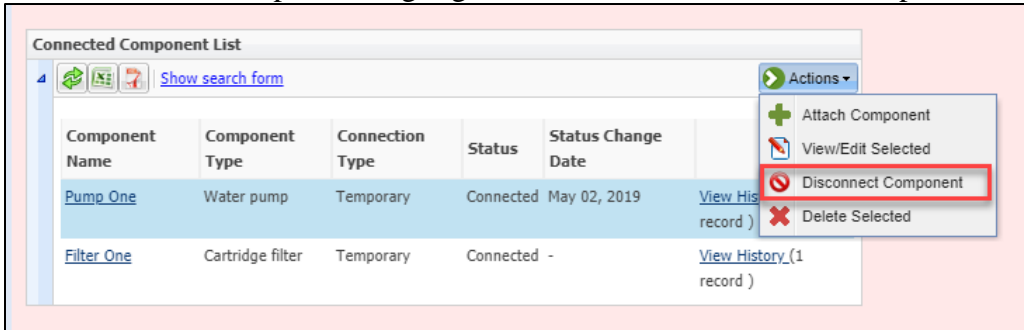

1. Record the Component Name.
2. Use the magnifying glass lookup to find the Component if you need to.
3. You can add a new Component directly from this screen.
4. The Component Type will prefill once the Name is entered and is not editable.
5. The Connection Type is Permanent or Temporary.
6. The Connection Status Change Date is the date you attached the Component.

The Component will now be attached to the Life Support:

Component Name	Component Type	Connection Type	Status	Status Change Date	
<a href="#">Pump One</a>	Water pump	Temporary	Connected	May 02, 2019	<a href="#">View History (1 record)</a>
<a href="#">Filter One</a>	Cartridge filter	Temporary	Connected	-	<a href="#">View History (1 record)</a>

To disconnect a Component, highlight it > Actions > Disconnect Component:

Component Name	Component Type	Connection Type	Status	Status Change Date	
<a href="#">Pump One</a>	Water pump	Temporary	Connected	May 02, 2019	<a href="#">View History (1 record)</a>
<a href="#">Filter One</a>	Cartridge filter	Temporary	Connected	-	<a href="#">View History (1 record)</a>

The 'Actions' dropdown menu is open, showing the following options:

- Attach Component
- View/Edit Selected
- Disconnect Component** (highlighted with a red box)
- Delete Selected

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

Record the appropriate date:

The Component will disappear from the Connected Component List. To find it again to reconnect it, open the Show Search Form and check “Include Disconnected Enclosures”.

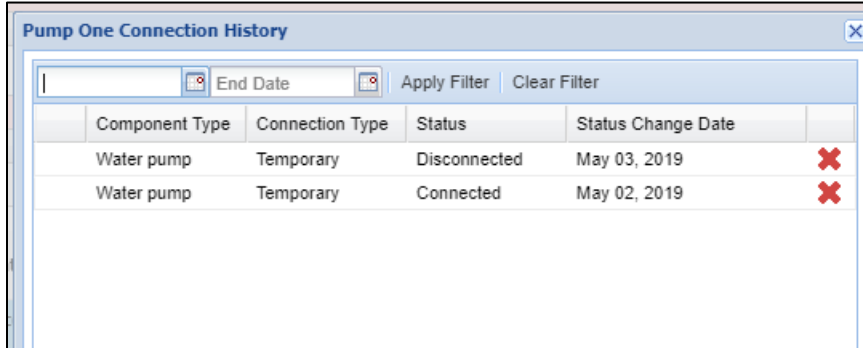

Component Name	Component Type	Connection Type	Status	Status Change Date
<a href="#">Filter One</a>	Cartridge filter	Temporary	Connected	-

It will now display with a Status of Disconnected with 2 records in its View History:

Component Name	Component Type	Connection Type	Status	Status Change Date
<a href="#">Pump One</a>	Water pump	Temporary	Disconnected	May 03, 2019
<a href="#">Filter One</a>	Cartridge filter	Temporary	Connected	-

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

Selecting View History will display the history of the attachments:

Component Type	Connection Type	Status	Status Change Date	
Water pump	Temporary	Disconnected	May 03, 2019	✘
Water pump	Temporary	Connected	May 02, 2019	✘

This component can be re-attached to the same Life Support using Actions > Attach Component or attached to an entirely different Life Support.

*Revised 7 May 2019*
