

HOW TO PUBLISH YOUR STUDBOOK

Contact support@Species360.org

Expectations for publication of studbooks are changing due to ZIMS for Studbooks. A “studbook report” is obtained by exporting a results grid to Excel or PDF. This can be printed or emailed. Contact your Regional Association for any specific requirements or guidelines that they have for studbook publication.

For a current studbook (living animals), select View List under Living Animals in the studbook dashboard. For an historical studbook (all animals ever recorded in the studbook), select View List under All Animals in Studbook in the studbook dashboard.

1132	1332	24Y,7M,4D	<input type="checkbox"/> UDFEXCLUSIONS
			<input checked="" type="checkbox"/> Pinned

The columns that display by default (even if you don't have them checked to view on the screen) are:

- Studbook ID
- Location
- Local ID
- Event Type, Date and Owner (will display when Show History box is checked)

You will probably want to include:

- Sex Type
- Birth/Hatch Date
- Sire & Dam IDs

For an historical studbook you probably want to include **Status**. If your Studbook covers multiple sub-species, you may want to include **Taxonomy**. If you have some animals collected from the wild you may also want to include **Birth Type**. Your Regional Association should be able to help you determine what columns they want included.

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

You can also select to sort the columns by ascending or descending order using the down arrow to the right of the column heading. In most cases you would probably want to sort the publication by ascending Studbook ID.

Filter: Status = Alive and As of Jul 02, 2019

Studbook ID ↑	Hatch Date	GAN	Current Location
1100		6335770	ST LOU
1232		17795305	TORON
