# Institutional Holdings in ZIMS Studbooks

#### Contact Species360 Support

Under the Tools bar is an option called "Institutional Holdings". This is similar to the Poplink "Current Holdings" report and replaces the SPARKS "Institutional Summary" report.

Topics Institutional Holdings display Filtering Institutional Holdings

## Institutional Holdings Display

The Institutional Holdings report shows a list of all institutions which have historically held the studbook species.

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

- 1. The Total number of institutions in your list displays at the top
- 2. Institution Name name of the institution
- 3. Mnemonic mnemonic of the institution
- 4. Country country where the institution is located
- 5. Association Institution's Regional Associations
- 6. ZIMS Institution ZIMS institutions will have a green tick, non-ZIMS institutions have a red cross. This helps you know if you need to contact the institution for updates.
- 7. Current Holdings this will display the number of animals currently held by the institution in the list. The number in blue is a hyperlink to the animal list
- 8. Historic Holdings this will display the number of animals historically held by the institution in the list. This number should include all animals ever held by this institution at any time (including those currently there). The number in blue is a hyperlink to the animal list.
- 9. Filter institutions Quickly filter your list for a specific institution
- 10. Export the list to Excel
- 11. Export the list to PDF
- 12. Refresh the list
- 13. Expand the filter menu to filter by Institution, Date, Taxonomy and/or UDF

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

All the columns in this list are sortable (Ascending or Descending) and column customization is available to add or remove columns.

S Exclude Institutions			
Institution: 4			
			🖨 Reset 🛛 Q Search

- 1. Choose to use previously saved filters
- 2. Save a new filter or manage previously saved filters
- 3. Add more institutions/continents/countries/associations
- 4. Exclude specific institutions
- 5. Institutions, continents, countries and associations included display here
- 6. Excluded institutions display here

#### **Date Filters:**

Filter: During Jun 02, 2020 - Aug 01, 2022							
Institution Date Tax	xonomy UDF						
🔿 As of End Date 💿 Date Range 🔿 No Restriction 🚺							
Start Date En	ud Date						
Jun 02, 2020 🛗 📝	Aug 01, 2022 🛗 2						

- 1. Choose to filter by 'As of End Date', 'Date Range', or 'No Restriction'
- 2. Choose your dates

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

www.Species360.org – Global Information Serving Conservation

Selecting an as of end date or a date range to view the number of institutions holding animals and the number of animal held at or during that time.

- The "Current" and "Historic" toggle buttons were removed from this tool now that there is the option to filter the report by date.
- The current holdings column will always display the institution's current holdings. If the user wants to see a list of only currently holding institutions, they can add an "as of" date filter and select today's date or they can sort the "current holdings" column.
- The historic holdings displays the total number of animals ever held by that institution regardless of dates selected.

When the user first opens the Institution Holdings report there are no filters applied and all historic holding institutions are displayed.

Institution Name	Mnemonic	Current Holdings	Historic Holdings	Holdings During Jun 0
		3 (3.0.0)	4 (4.0.0)	3 (3.0.0)
1000		4 (0.4.0)	7 (1.6.0)	4 (0.4.0)
		11 (4.7.0)	18 (9.9.0)	11 (4.7.0)

• When the user filters by a date range or as of end date the list will filter to institutions that held animals during the filter and a new column displays in the Institutional Holdings screen with a header "holdings during the date entered in the filter." This new column displays the animals held at institutions during or as of the time selected. User can select the hyperlinked number to view a list of animals held by the institution.

#### Taxonomy Filters:

Institution Date	Taxonomy UDF		
Taxonomy (Select one	or more):		
Acinonyx jubatus / (	lheetah ×		-
Acinonyx jubatus heck	i / Northwest African cheetah		
Acinonyx jubatus juba	tus / Southern African cheetał	1	

If you manage a studbook with multiple taxonomies, filter by any of the taxonomies included. You can select to filter by one or more taxonomies.

#### **UDF** Filter

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

www.Species360.org – Global Information Serving Conservation
