Medical Moments

Quick Information From the Animal Husbandry Module

A keeper brings you one of your education program armadillos for an exam. "This is Local ID M11012" he tells you. After the exam you open the medical record to enter

your findings before sending the animal back to its holding area. Just to make sure you are in the correct record you want to check that the tattoo you read in its right ear, "ABC", corresponds with that record. Using the right hand hyperlink you open the Husbandry Records. Because in your Preferences you have selected

by default you can quickly view the animal's identifiers. The keeper gave you the wrong Local ID! The animal you have in hand is NOT Local ID M11012 as the tattoos do not match. You do an Advanced Search for tattoo ABC and find the correct record. "It never hurts to check!" you remind yourself. Identifiers, Weights, Lengths and Contraception information are all found in the Animal Husbandry module.

They're counting on you for their medical care. We can help.

/ Complications: None / Recov	Heather Miller		Last Weight	2,700 gram (Oct 06, 2014)			
CIUM BOROGLUCONA	Heather Miller		Collection	Main Institution Animal Collection			
GLUCONATE 0.08 ml once a	Heather Miller		Health Status	Abnormal (May 08, 2014)			
			Body Condition Score	<u>9/9</u> (Apr 22, 2014)			
tized for bloodwork and r 🧃	From Medarks						
/ Complications: None / Recov	From Medarks		Active Problems No Active Problems F	Found			

Rank

Taxonomy

From the medical dashboard, the red GAN on the right side is a hyperlink to the animal's Husbandry Record.

Identifiers, Weights, Lengths and Contraception are found in the Husbandry module. You can set these grids to be open by default using My Preferences>Application Settings>Module Boxes.
