

Thanks to Susan Miller from Binder Park Zoo who submitted this tip!

Q: Oh that vacation was fun but now you have to catch up with all the keeper notes on the new giraffe. Will that require hours of time to enter them one by one?

A: It won't! Use the Save & Repeat function for Notes and Observations.

Simply enter the first note and select Save & Repeat. The note will save but the screen will remain open. You can edit any of the fields and select Save & Repeat again. When you are all done select Save and the screen will save and close. Save & Repeat is also available for animal weights and lengths!

Add New Note

Note Date * Aug 01, 2015

Keywords exhibit introduction

Note Type * Individual Behavior

Note Sub Type Individual Behavior (BS)

Note

Note Templates

Introduced to the exhibit today. Cautiously left the holding barn but stayed within 20 feet of the open door.

Save Save & Repeat Cancel

◀ Save & Repeat is found next to Save on the data entry screen.

Because we used Save & Repeat the only data we had ▶ to edit was the date and the actual note itself. When you are done with all your entries select Save.
