

Animals-Alert Search Options

Finding your Animal Alerts

[Contact SPECIES360 Support](#)

To find your Animal Alerts open the Animals module >Animal Alert Search in the left hand search box.

As for all searches, the more filters you use, the shorter the results grid is. Some things to note about this search:

Alert Text Must be entered in the correct order. If the Alert was recorded as “physical exam” but you typed in “exam physical”, the Alert will not be found.

Start Date From and To refer only to the Start Date of the Alert, not the Start and End Date.

Include Removed Alerts refers to any Alerts that have been marked as Complete. The search will not find any Alerts that have actually been deleted.

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.
