

Animals - Physical Holder History

Viewing and interpreting the animal's physical holder history

[Contact SPECIES360 Support](#)

The Physical Holder History grid is found on the Details tab in an animal/group record and reflects all the institutions the animal/group has physically been held. Whereas the My Transactions tab displays only information about the record and your institution, this grid tracks an entire history of institutions that ever held the animal. The grid can be exported to Excel or pdf and all of the columns can be sorted by ascending or descending order.

	1	2	3	4	5
	Date ▲	Term	Physical Sender	To	Reported By
1	Aug 15, 2006	Birth/Hatch	-	RIO GRAND / B06034	RIO GRAND

The Physical History above is interpreted as:

1. On August 15, 2006, RIO GRAND reported a Birth/Hatch at their institution
2. On June 04, 2008, RIO GRAND reported sending the animal as a Sale to DENVER
3. On June 04, 2008, DENVER recorded receiving the animal as a Purchase from RIO GRAND
4. On March 20, 2014, TRACY AV recorded receiving the animal as a Donation from DENVER. DENVER did not also record a transaction for this because at this time there was no longer a bridge between the TRACKS software that DENVER uses and ZIMS.
5. On May 24, 2017, TRACY AV recorded sending the animal as a Donation to GREENVISC.
6. On May 24, 2017, GREENVISC recorded receiving the animal as a Donation from TRACY AV. The green dots on 5 and 6 indicate that the transaction was confirmed in ZIMS.

To understand the entire transaction history, you may need to compare this grid with the Ownership Transaction grid. See [Ownership Transaction History](#)
