

Life Support - Tree View

Viewing your life support systems in a tree

[Contact Species360 Support](#)

You can view your life support systems as a tree in order to easily see how they are organized.

As with any tree, you can expand "branches" by clicking on + signs, and contract them by clicking on - signs:

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.

www.Species360.org – Global Information Serving Conservation

You can also right-click on any life support system, enclosure, or connected component in the tree and see its details:

Revised 10 August 2017

** Species360 Organizational name change added on 07/18/2016*

It is the mission of Species360 to facilitate international collaboration in the collection and sharing of information on animals and their environments for zoos, aquariums and related organizations.
