

Group View Plus

Enhanced group management view in ZIMS Medical
[Contact Species360 Support](#)

The Group View Plus allows you to view medical records that are associated with individuals or groups that were merged into or split out of the group in focus.

Below we have a single group in focus and can view its medical records.

The screenshot shows the ZIMS Medical interface with a sidebar on the left containing a 'Records' menu. The main area displays a table of medical records for a single group.

Animal	Date	Details	Responsible Staff
103881 / Yellow-and-blue poison dart frog / PLT13-00343			
103881 / Yellow-and-blue poison dart frog / PL...	Oct 09, 2014	Feces / AUDUBON / Parasitology(1/0)	Adrienne Miller
103881 / Yellow-and-blue poison dart frog / PL...	Sep 28, 2014	00:00 / Feces / /	Adrienne Miller
103881 / Yellow-and-blue poison dart frog / PL...	Sep 26, 2014	General: Entire group looks underweight	Adrienne Miller

By selecting the green arrow icon we can also include medical records of other groups that may be associated with the group in focus by either a split or a merge. Here we have the medical records for two associated groups displayed along with the original group in focus.

The screenshot shows the ZIMS Medical interface with a sidebar on the left. A red arrow points to a green arrow icon in the sidebar. The main area displays a table of medical records for three groups, with the first two groups highlighted by a red box.
