

Medical Moments

Test Panels

Your institution is known for its extensive collection of turtles and tortoises, both common and exotic. As part of your Veterinary care for this collection you collect plasma several times a year and use the test results as part of an on-going study of the differences between the species. There are eighteen tests that are requested from each of your turtles. To save data entry time you have created a Test Panel for the eighteen measurements. This panel will save data entry time as you can tab through each test in the panel grid and record the results for each animal instead of entering test results one at a time. It also ensures that all of the tests are requested for each animal and the results reviewed. You can save panels for in house analyzers as well as reference labs.

They're counting on you for their medical care. We can help.

Test Panels

To create a new Test Panel open Tests and Results and select the wheel to the right of Test Panel to open the Manage Test Panel box. Select Add New Panel and complete the screen. To record the Test UOM double click on the white space next to the test. You can adjust the order of the tests by using the Move Up and Move Down arrows.

Test	Primary Result	Secondary Result	Low RI	High RI	Evaluation	Excl. from RI	Clinical Finding	Reviewed	Remove
Albumin	1.5 g/dL	N/A	0.0	2.5	~	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	✗
