

Q: The roof in your Bird Curator's office sprang a leak and the notebook with the printed Specimen Reports for the Aviary is unreadable. Reprinting all those reports one by one will take ages.

A: Use Multiple Specimen Report!

When selecting to print a Specimen Report you are not limited to only one record! You can enter as many records as you would like printed. Remember to select your filters properly as they will all be printed with what you select. Choose to Run Report and go on to something else, like visiting the Aviary!

Many thanks to Ken Naugher from Montgomery Zoo, who submitted this tip!
